

Brownfields 2016 Cleanup Grant Fact Sheet

Palmetto Community Redevelopment Agency, FL

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Palmetto Community Redevelopment Agency for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Edenfield Property on 505 5th Street West. The property was formerly owned by the Tampa Southern Railroad Company and previously used as a freight yard. The soil is contaminated with polycyclic aromatic hydrocarbons and arsenic. Grant funds also will be used to conduct community outreach activities.
